

## KW Trams

### **KW 072 Preston 27**

#### Parts

1. Upper floor	x2
2. Tram side	x2
3. Bulkhead	x2
4. Bogie side	x4
5. Platform	x2
6. Dash panels	x2
7. Upper deck side decency panel	x2
8. Upper deck end decency panel	x1
9. Life tray	x2
10. Front life Guard	x2
11. Side lifeguard	x2
12. Steps	x2
13. Front destination box	x2
14. Side destination box	x2
15. Destination letter box	x2
16. Controller	x2
17. Handbrake	x2
18. Handbrake wheels	x2
19. Trolley mast	x1
20. Stairs	x2
21. Resistance box	x2
22. Balcony seat	x2

#### Build Steps

1. Fix one bulkhead square to each side, then join the two sub-assemblies together to create a box.
2. Attach the platforms centrally under the bulkheads with the rear wide sections flush with the bottom of the bulkhead. You may need to trim the edges of the platforms so that they fit inside the body.
3. Fit an under-stair gate (not supplied) on the near side of the platform touching the bulkhead.
4. Bend the dash panels to match the shape of the platform, trim to length so that it fits against the under-stair gate and fix in place.

5. On a flat surface, join the two halves of the upper floor together, then fit centrally to the body.

6. Fit the open top sides, bending the end panels so that they run across the middle of the floor extension and then round to the top of the stairs. If required, trim the lower edge of the end decency panel to get a good fit to the floor.

7. Turn model over to fit the steps, lifeguards and life trays. Fit the side lifeguards if required.

8. Fit the trolley mast to the left of the middle of the upper floor.

9. Fit the stairs unless you wish to paint them first.
